Hello Guys, I have a problem with my PMDG 777-200LRF SP1b update. It is in German. I am getting an error message: FÄ¼r zusÄtzliche AktivitÄten wird ein Update verwendet. UPDATE: I was directed here for help because I couldn't get the New PMDG 777-200LRF SP1b Update for WINGS X-Plane 10.0 to validate. The error occurred when I was loading the aircraft and scene. I have tried all suggested fixes for the problem.Q: Generalizing GroupHomomorphism Suppose I have a group homomorphism $f:G \rightarrow H$ and two groups G and H , is it always true that G acts on H iff $f(G) \leq H$? In other words, if and only if $f(G)$ is a normal subgroup of H , is it always true that G acts on H ? A: Suppose that G acts on H . Let $g \in G$ and $h \in H$. I claim that the map $g \mapsto ghg^{-1}$ is a group homomorphism from G to H . To show that this is a homomorphism, we need to show that the following diagram commutes.
$$\begin{CD} G @>f>> H \\ @V{=}VV @VV{=}V \\ G @>g>> H @>{ghg^{-1}}>> H \\ @. @VV{=}V @VV{=}V \\ H @>{=}>> H @>{=}>> H \end{CD}$$
 Let $g, h, k \in G$. We must show that $ghg^{-1}k \in H$, where $(ghg^{-1}k) = ghg^{-1}(gk) = (hg)g^{-1}gk = (hg)(g^{-1}g)k = h(gg^{-1})k$. Then the commutativity of the diagram follows. Now note that the map $g \mapsto ghg^{-1}$ is an injective homomorphism, so
